Monitoring Data Record

Project Title: R-2568B (Site 4)		
Stream Name: <u>UT to Rich Fork Creek</u>	_	
City, County and other Location Informatio		
to North of SR 1756 (Lexington Ave.) Sta.		
Date Construction Completed: water was tu	irned on 8/29/05, pla	anted on 2/17/06
Monitoring Year: (3) of 5		
Ecoregion:	8 digit HUC unit_	
USGS Quad Name and Coordinates:		
Rosgen Classification:	1 5 1 1	
Length of Project: 315' Urban or Ru		
Monitoring DATA collected by: M. Green	& J. Young	Date: <u>8/15/08</u>
Applicant Information:	. 177 .	
Name: NCDOT Roadside Environm		0
Address: 1425 Rock Quarry Road		·
Telephone Number: (919) 861-3772	Email ad	dress: mlgreen@dot.state.nc.us

ADDIT		ed hardwood vegetation noted onsite includes: black willow
	live stakes Other vegetation note	ed onsite includes: goldenrod, sedge, Scripus sp., sycamore, v
dogwood		
dogwood		imosa, Juncus sp., and various grasses. The streambank and f

Section 2. PLANT SURVIVAL

Attach plan sheet indicating reference photos.

If required to complete Level 1 and Level 2 monitoring only stop here; otherwise, complete section 3.

Section 3. CHANNEL STABILITY

Visual Inspection: The entire stream project as well as each in-stream structure and bank stabilization/revetment structure must be evaluated and problems addressed.

Report on the visual inspection of channel stability. <u>Physical measurements of channel stability/morphology will not be required.</u> Include a discussion of any deviations from as-built and an evaluation of the significance of these deviations and whether they are indicative of a stabilizing or destabilizing situation.

The channel is stable throughout the entire onsite stream relocation for the Year 3 Summer evaluation. NCDOT will continue to monitor this stream relocation.

Date Station Station Station Station Station Inspected Number Number Number Number Number Structure Type Is water piping through or around structure? Head cut or down cut present? Bank or scour erosion present?

NOTE: Attach separate narrative sheets to each monitoring report describing/discussing the overall monitoring results. Include the identification of specific problem areas/channel failures, estimated cause and proposed/required remedial action. This should include a brief discussion of any parameter that has changed significantly from as-built.
